FORESTRY SERVICES

In serving our customers with diligence and a commitment to future generations, **NEFP** promotes sustainable forestry practices. Our licensed professional forester, Dave Buxton, is available to work with landowners to develop management and harvesting plans which will implement practices that will meet the landowner's objectives; including working towards rewarding investment goals.

New England Forest Products offers a variety of native hardwood and softwood lumber and lumber products. Our goal is to provide our customers with native lumber of the highest quality available—without compromising our greatest sustainable resource—timber.

Our native lumber is harvested from forests that are sustainably managed.

**EXCELLENT
MATERIALS
GREAT
CUSTOMER
SERVICE**

I have a small wood working shop in New Bedford, MA. where I build custom furniture. At New England Forest Products, the pricing was great and the materials were excellent. The highest quality in every aspect. Moreover, the customer service was outstanding! CJ Hall spent over 2 1/2 hours with me going all over the lumber yard to insure I had the

materials I requested and my order was under a \$1000! They fill orders for the big corps, but gave me as much time as they would have for one of their major accounts. Being a small business I can appreciate this greatly and recommend New England Forestry products to anyone who seeks excellent materials at a great price and who wants to be treated to great customer service.

PURCHASE LOCALLY AT MILL DIRECT PRICES

New England Forest Products has been manufacturing native hardwood lumber in Greenfield, New Hampshire since its founding in 1993 by Dave Buxton, a New Hampshire licensed professional forester.

In July 1997, a freak tornado whipped through the area, reducing the newly renovated mill to rubble. The mill was up and running again in six weeks. Our employees never lost a day of work and our customers and suppliers never missed a beat.

The summer of 2008 saw NEFP expand its offerings with the opening of our 5,000 square "mill direct" retail building. We are now able to offer excellent quality, finished and rough native hardwood and softwood lumber to our customers.

In the retail store, customers will find a full line of high quality hardwoods, including **northern red oak, hickory, maple, birch, and native pine**. NEFP carries **flooring, stair parts, standard patterns of white pine (V-match, shiplap, paneling), cabinet grade hardwoods, dimension lumber, softwood planking timbers and more**. We also do **custom sawing**. We specialize in lumber that is **native** to this region and that has been sustainably harvested.

CUSTOM HARDWOOD
CABINETS AND FLOORING

NEFP RETAIL BUILDING

POST AND BEAM BARN

The lumber industry is the original "Green" industry. Our sawdust is sold to wood pellet companies and made into wood pellets, wood chips are sold to power plants and schools, the bark becomes that beautiful dark bark mulch used to announce the end of winter! What doesn't end up as lumber, pellets, fuel for power plants and schools, or bark mulch, is used for cordwood. There is virtually no waste here.

Starting from working together with landowners to implement a management plan for their woodlots including wildlife habitat management and low impact harvesting of the timber, to the manufacturing process, and finally to local retail sales, **NEFP** is committed to sustainability.

NATURAL BIRCH

{ ...quarter sawn
RED OAK
FLOOR looks
SPECTACULAR. }

Thank you for the great service, and great product you provided! The quarter red oak floor looks spectacular. We really appreciated the predominance of long lengths in the order. The milling of edge and butt joints was perfect, making the installation a pleasure.
